To Whom It May Concern:

It is my pleasure to write this reference for Zhaobo Wang in support of his application.

I am Dr. Ratnasingham Thamarasa, an assistant professor at McMaster University. I have 19 years of experience working in target tracking and resource management for defence and civil. I have known Zhaobo Wang since January 2021 as a course instructor. He was a student in my second-year class on Data Structures, Algorithms and Discrete Mathematics.

In this course, students had five labs, which involves developing efficient implementations of algorithms and estimating the performance of the implementation using asymptotic time and space complexity analysis. Zhaobo completed all these labs successfully and got good results. Zhaobo was an international student and had 12 hours time difference from Eastern Standard Time. Due to COVID-19, this year we had lectures and labs online. Zhaobo was able to complete each task on time, even in this challenging online lab and exam settings.

Overall, Zhaobo is hardworking, highly motivated and can work well with others and independently.

Should you have any questions, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Rha", written over a horizontal line.
